

.health.nz Second Level Domain Application - Submission

From: Rick Shera

Received: October 13, 2008

I write to confirm that on my brief run through the revised moderation policy, it appears that the issues that I raised in my earlier submission have been addressed. I am not suggesting that I agree or disagree with the *way* in which they have been addressed since I am not an expert in the Health Sector but I think the changes to tighten up the criteria for registration (both initial and ongoing), around removal of a domain name and on who may obtain a name, are all very welcome.
