

.nz Policy Framework Review

From: Jonathan Brewer

Received: 30 July 2015

Dear DNC,

I am opposed to the proposed change to the .nz Policy Framework Draft Operations Policy laid out in section 23.5.

23.5 DNCL and NZRS may use the zone data to ensure the efficient management and operation of the .nz zone and .nz domain name space, for reasons of "public good", and for developing new services.

I do not believe DNCL and NZRS have the explicit support of the majority of .nz domain holders when it comes to using their private data to develop new commercial services.

Regards,

Jonathan Brewer
