

Application for a new 2LD - parliament.nz Submission

From: Jacob Doherty
Received: 24 March 2005

I would like to raise my objection to this 2LD application.

I believe that it appears to be simply creation for creations sake.

The .govt.nz 2LD seems to service this community effectively - the general New Zealand internet public would not really be able to distinguish between the two communities (Parliament and Government) and would be unsure which domains should be in which category.

It might also lead to duplication of names in both 2LD's as Registrants realise that the general public may not look for their site under one or the other of the 2LD's.
